DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15 ($A_{br}B_{br}$), 30-46 ($A_{sp}B_{sp}$) and 51-54 (CA_{br}), drawn to a vehicle location system, classified in class 701, subclass 300.
 - II. Claims 16-24 (B_{br}) and 55-59 (B_{sp}), drawn to an optical transmitter, classified in class 398, subclass 182.
 - III. Claims 25-29 (A_{br}), drawn to the optical transceiver, classified in class 398, subclass 135.
 - IV. Claim 47-50, drawn to a method of vehicle identification, classified in class 701, subclass 32.
2. The inventions are each distinct from each other for the following reasons:

Inventions I and II / III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 1 ($A_{br}B_{br}$) is an evidence claim which indicates that combination claims 30-46 (AB_{sp}) do not rely upon the specific details of the subcombination claims 55-59 (B_{sp}) for its patentability. Accordingly, where

Art Unit: 3663

the combination evidence claim (AB_{br}) does not set forth the details of the subcombination (B_{sp}) and the subcombination has separate utility (such as an optical network card), the inventions are considered distinct and restriction is PROPER. See MPEP § 806.05(c).

3. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as in the game Laser Tag. See MPEP § 806.05(d).

4. Inventions IV and I / II / III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case inventions I, II, and III can be used to practice a method of vehicle steering control.

5. Upon election of invention I above, applicant is required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

A. The species drawn to an aircraft.

B. The species drawn to an airfield.

6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement (e.g., **1, A**), listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
